

City golf in Stuttgart

Stuttgart, charmingly situated in the heart of one of Germany's largest wine-growing regions and a vibrant metropolis, fascinates visitors from all over the world. The state capital of Baden-Württemberg delights tourists not only by virtue of its magnificent panorama, its impressive gardens and parks, its fine squares, splendid palaces and buildings in a wide range of architectural styles, but soon also because of its City Golf project.

City Golf will be a Public Golf Course covering a total area of 15000 sq m with 6 holes and will enable the general public to practice their golf for an affordable price. The 6-hole Golf course will also have a 185 m long driving range.

The initiative for building this golf course came from Herr Munckner and is being subsidized by the City of Stuttgart.

Since City Golf will not be able to rely on high membership and green fees to maintain its course it is even more important that costs are kept to a minimum. At the same time the aim is to provide a top-class experience for the golfers.

That is exactly where DOMO Sports Grass comes in with the perfect solution(s). With our state of the art Golf Grass collection, we can provide a total solution for any kind of Golf Course. Our very specialized grass guarantees high-class performance while requiring minimum maintenance. Of course the best Artificial Golf Grass also deserves the best sub base available. And that is exactly where we rely on the expertise of our Partners and Sales Managers. Not only did we convince the investors in City Golf of the quality of our grass, but by advising them on a sub-base that would optimize ball roll and ball bounce, they were confident to choose Domo Golf Grass.

We would like to thank our Partner Sport Tartemann for their invaluable and continued support.
