

DOMO CHAMPION INFINITY

The latest generation of artificial grass fields on the market without rubber infill

*Artificial grass has undergone some impressive developments over the last few years. These developments have now reached a new peak with **DOMO Champion Infinity**.*

Artificial grass can be played on in all weather conditions and can accommodate up to three times more playing time than ordinary grass. The DOMO R&D team have now added a number of further benefits. They have created a very hardwearing and maintenance-friendly artificial grass system, Domo Champion Infinity, **the first artificial grass field rubber infill**.

The first reference projects with Domo Champion Infinity were installed in Switzerland in 2007. An absolute world first, the pitch was laid in Hergiswil (Lucerne) in Switzerland. This pitch successfully underwent a field test according to EN15330-1, the new European standard for artificial grass playing fields. Both the national and international football world greeted this pitch with praise and applause.

A number of other fields quickly followed in New York, Switzerland, Teufen, and Uni Sint Gallen. Now in Belgium we have the absolute firsts with the football pitches of K. Lierse S.K. and KFC Houtvenne. Both clubs attach a great deal of importance to a perfectly playable field the whole year through, without the smell of rubber and with little maintenance. Domo Champion Infinity also guarantees a perfect kicking technique, the "ball roll" and the "foot under the ball" are both a perfect match for play on natural grass. In addition, this pitch has a further bonus, it has a splendid appearance and looks supernatural. Due to the absence of rubber, the pitch requires little to almost no maintenance - one of its greatest assets. Rubber does not have to be regularly added or brushed in. Moreover, a Domo Champion Infinity field is environmentally friendly. The polyamide fibre from which the field is made is perfectly recyclable. No rubber infill material is involved. If the pitch has to be replaced in the future it will not involve any high costs. Domo Champion Infinity satisfies the ESSM standard, the strictest environmental standard in Europe.

DOMO SPORTS GRASS. A powerful experience.

DOMO® SPORTS GRASS is a pioneer in the field of artificial grass for sports. Our passion for top performance and our admiration of sports heroes drive us to develop the perfect playing surface. For champions and all other sportsmen and women who inspire us every day to put all our knowledge and experience in the service of that one moment when it really matters: an unforgettable moment of strength, release and emotion.

EXPERT IN ARTIFICIAL GRASS

Across the world, Domo® Sports Grass is responsible for more than 50 million m² of installed artificial grass for football, hockey, tennis, American football, rugby, golf, skiing and multifunctional sports applications. A good 25 years of experience and close cooperation with local authorities, borough councils, schools, sports federations and top players have made Domo® Sports Grass an expert in the development and installation of durable and easy to maintain artificial grass fields. Domo® Sports Grass helps you make the best choice: we offer advice on the grass surface, the base and infill systems, drainage and maintenance. Our partners deal with the installation and after-care such that your playing surface is always in a perfect condition.
